

For people who **can hear**
but are **unable to speak**.

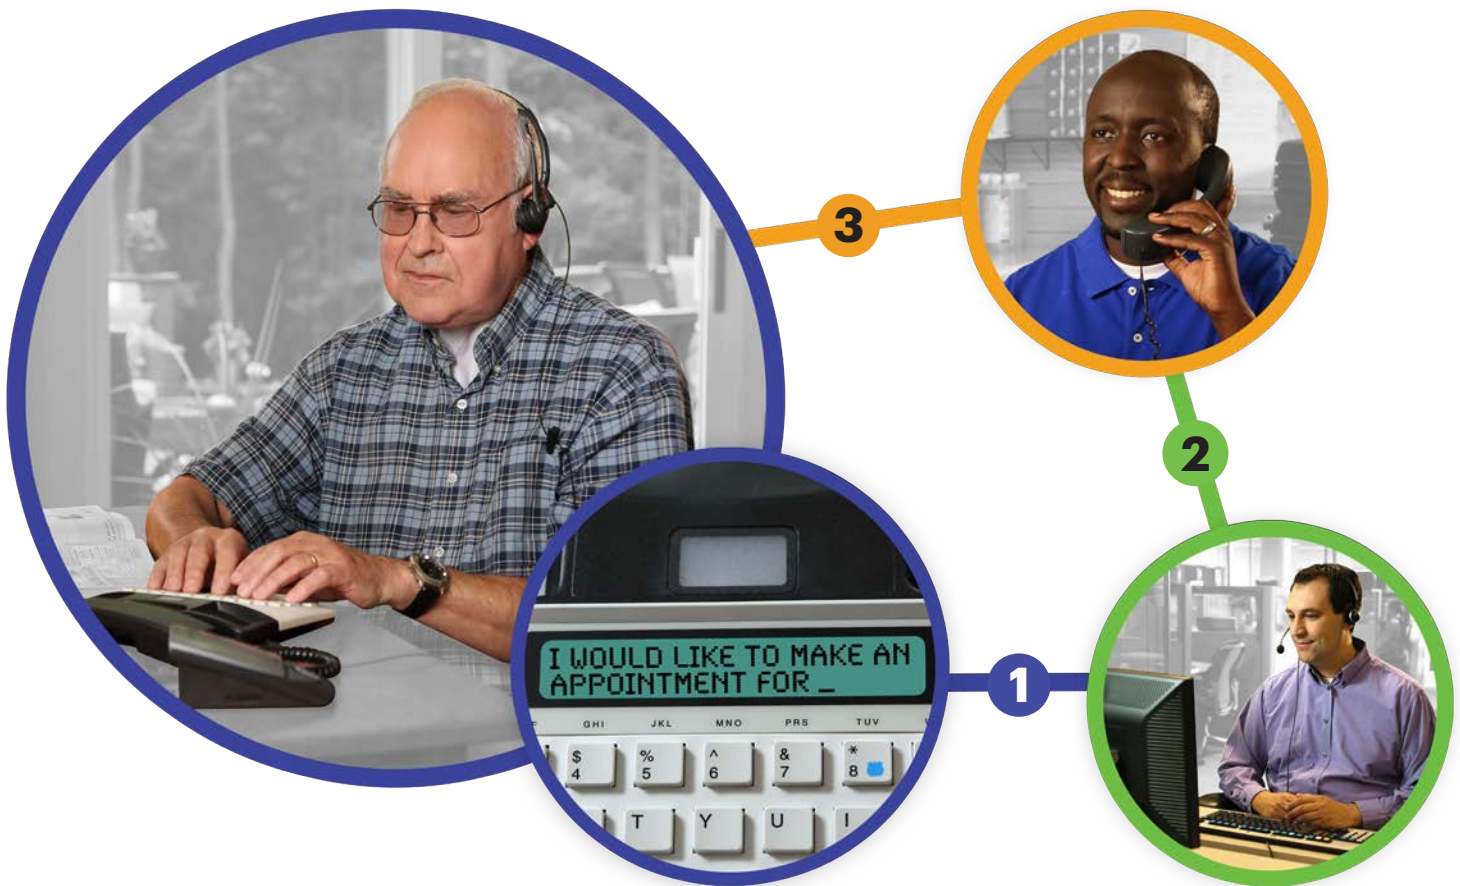

Hearing Carry-Over

711 or 800-735-2900

People who can hear but are unable to speak on the phone due to a speech disability can use **Hearing Carry-Over (HCO)**.

HCO allows users with a speech disability to listen to the other party. The HCO user types their conversation for the relay operator to voice to the other party before they respond to the HCO user.

OTHER HCO FEATURES

Oregon Relay also has two HCO features:
HCO to TTY and **HCO to HCO**.

For more information on HCO:

oregonrelay.com/hco

- 1** The HCO user types his words to the relay operator.
- 2** The relay operator voices the typed message to the other party.
- 3** The other party responds to the HCO user.
